# COUPA SERVICES MAESTRO

According to Forrester Research, in 2015, across all industries in the United States, services represented 58% of non-staff purchases, increasing to 75% in certain services-oriented industries. In a world that is increasingly "as-a-service", every organization needs to manage all services spend effectively in order to compete on a global scale.

Current tools are either siloed, which undermines Procurement's mission to maximize spend under management, or they are complicated, due to complex user interfaces and workflows, which lead to poor end user and supplier adoption.

Coupa Services Maestro features a **user-centric workflow** that builds on Coupa's **comprehensive** business spend management (BSM) platform, enabling Procurement teams to manage services spend just as easily as they manage goods spend.

## Improve Collaboration with Suppliers and Internal Stakeholders

Coupa Services Maestro is simple and easy to use, which makes it easy to collaborate with external labor or consultants as well as internal stakeholders across the lifecycle of any time-or-deliverable-based project. In addition, granular services data lets you resolve disputes effectively and efficiently.Fully customizable and automated project workflows remove the administrative burden of managing complex sourcing events.

## Ensure Compliance with Negotiated Rates and Approved Timesheets

With Services Maestro, you can be sure invoices always match negotiated rates, and that you're only paying for work that was actually done. Apply the same level of rigor and control to the procurement of services that you do for the procurement of goods, resulting in comprehensive spend visibility.
