SUPPLY CHAIN MODELER

Drastically Reduce the Time to Design

Change is accelerating and supply chain design decisions must be made faster than ever before. Making optimal decisions requires a complex set of trade-offs and massive amounts of data. Without advanced modeling capabilities, organizations struggle to consistently adapt their supply chains as the market evolves around them.
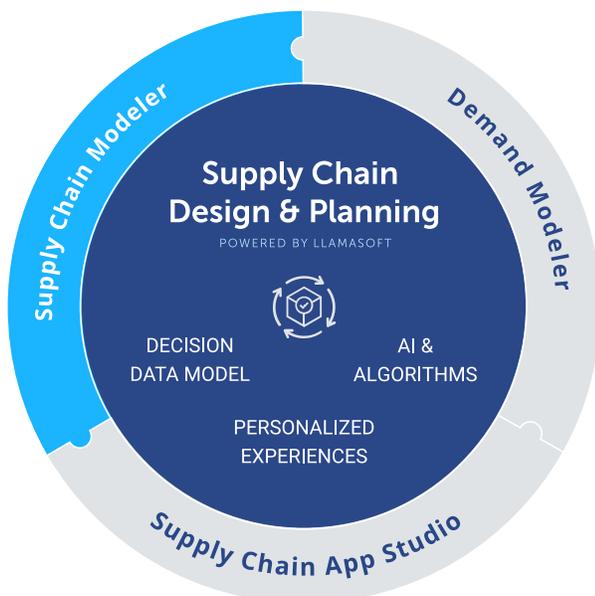

Coupa Supply Chain Modeler is the industry's leading supply chain design offering. The all-in-one modeling solution uses advanced algorithms to deliver data-driven decision support through:

- Network Design Optimization
- Routing and Flow Path Optimization
- CapEx Analysis
- Production Optimization
- Cost to Serve Analysis
- Inventory Optimization
- And much more...

Part of Coupa Supply Chain Design & Planning powered by LLamasoft, this innovative offering now drastically reduces the time to decision as well. It transforms supply chain design and analysis from a one-off project into a consistent and repeatable process, unlocking the potential to continually answer design questions at the pace of change.

Supply Chain Modeler provides your team the tools it needs to quickly access data, model the supply chain, and run countless scenarios – to help you confidently reach the outcome you prefer.

It leverages the platform's always-on Decision Data Model to provide instant access to relevant information from across your supply chain planning and execution systems, data lakes, and external data points. Supply Chain Modeler allows you to analyze and optimize the supply chain across specific use cases and easily collaborate with and share information among relevant stakeholders across the enterprise.

PERSONALIZED EXPERIENCES

Supply Chain App Studio

Adopt continuous supply chain design and planning

Coupa Supply Chain Design & Planning powered by LLamasoft delivers the science behind smarter, faster supply chain decisions.

Built exclusively for analysis of the extended supply chain, it harnesses advanced algorithms and a digital model of your extended supply chain for facilitating experimentation and trade-off testing to uncover what affects both tactical and strategic decisions.

Get in on the revolutionary impact AI is having on operations, strategy, and competitive gains.
