

Coupa for Travel & Expenses

Organizations today are required to stitch together multiple tools and services just to build an effective T&E program. Because these tend to be disparate systems, each tool creates an information silo that makes it difficult for businesses to have end-to-end visibility and control over their T&E spend.

As one of the most comprehensive solutions on the market, Coupa Travel and Expense enables organizations to unlock the full power of their T&E spend. Designed for modern organizations, Coupa streamlines T&E with an end-to-end travel and expense management solution that eliminates silos and scales with your company's unique needs.

User-Centric Experience

Maximize program adoption to capture all T&E spend

Built from the ground up to be user-friendly and easy to adopt, Coupa enables employees to quickly find and book the best trip for them and your company. Provide employees with clear and useful guidance on how to spend to encourage good spending behavior and reduce risk for the organization. Higher program adoption leads to more visibility and control of T&E spend.
